MAIL ORDER PLASTICS

Plastics for Industry, Business, Laboratory, Display,
Home, Hobbyist, Boatman

HOW TO ORDER

Thank you for requesting this catalog. We'd enjoy the opportunity to fill your plastic needs — rapidly and efficiently. We stock the materials listed in these pages quite heavily and ship quickly.

There are three ways to order from us:

1. Send a check or money order with your order, including postage and tax where appropriate. Please do not send cash or stamps.
2. Purchase C.O.D. A 25% deposit must accompany all C.O.D.'s.
3. Open account billing is extended only to organizations with established credit ratings. To open an account, please send three credit references and your bank. Organizations favorably rated in "Dun & Bradstreet" need not send references and may order directly. Schools, hospitals and similar institutions may order on open account provided their orders are submitted on an official order form and signed by the proper authorities. Sorry, we do not set up personal credit accounts. Terms are **net 30**.

MINIMUM ORDER: There is a minimum order of \$5.00. No order for less than \$5.00 will be filled.

POSTAGE-FREIGHT: All prices are **F.O.B. Mail Order Plastics**. You pay postage (or freight). For straight mail order (not C.O.D. or open account) simply add 10% for postage to your enclosed check or money order. Any overpayment of postage will be immediately refunded.

SALES TAX: New York City residents please add 5% sales tax. New York State residents please add 2% or higher where applicable. All organizations exempt from sales tax or purchasing for resale, please include appropriate forms with your order.

INQUIRIES & QUOTATIONS: Dealer inquiries are invited. Inquiries and requests for quotations regarding variations on items offered are also welcome.

RETURNS & CLAIMS: All items are guaranteed to be entirely as represented. Returns will not be accepted without the written permission of Mail Order Plastics. Any claims must be made in writing within 10 days of receipt.

Direct all **breakage** claims immediately to the delivering carrier.

Prices are subject to change without notice.

GLASS-REINFORCED STRAPPING TAPE

You can see the fibers that "insure" your carton

A wise shipper wouldn't consider sending a package or carton without insurance. Glass-reinforced strapping tape is another form of insurance.

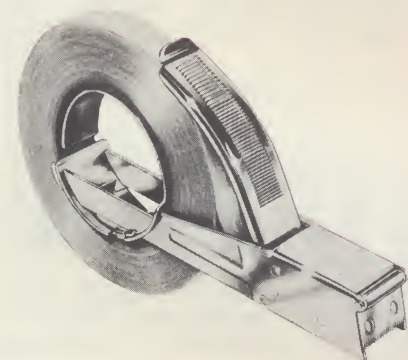

This modern strapping tape offers many advantages to the user. It combines high tensile strength, fine adhesion, flexibility, weather-resistance and impact strength. In **simple** terms, it's **very** strong. It will conform to irregular shapes. It's easy to apply. It **HOLDS**.

Pictured at left is a roll of glass-reinforced strapping tape in a hand dispenser. For frequent users the dispenser is recommended, but a good scissors, hand utility knife or razor blade will cut this tape too.

The standard length of a roll is 60 yards.

PRICES PER ROLL

WIDTH	ROLLS PER CASE	1-11 ROLLS	12 ROLLS TO CASE LOT	CASE LOT PER ROLL	3 CASE* PER ROLL
1/2"	72	\$1.75	\$1.50	\$1.25	\$1.20
3/4"	48	2.50	2.00	1.75	1.70
1"	36	3.00	2.40	2.15	2.10

HAND DISPENSER — \$600

*DIFFERENT SIZES OF TAPE MAY BE COMBINED FOR 3 CASE QUANTITY PRICE.

*A HAND DISPENSER IS INCLUDED FREE WITH EACH 3 CASE ORDER.

FLAT PLASTIC LETTERS

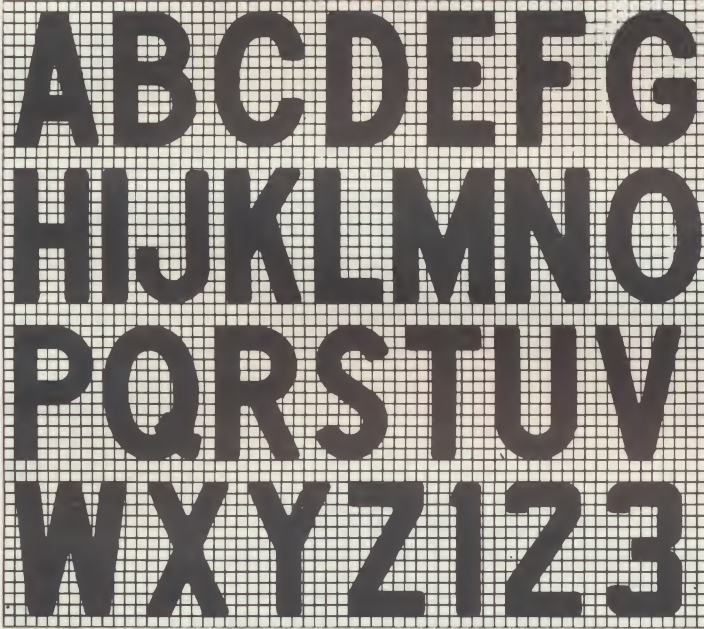

The flat plastic letters listed on pages 1 & 2 are made of acrylic plastic (except the special boat letters). Acrylic is waterproof and has a bright finish. The letters may be used safely both indoors and outdoors.

ALL LETTERS ARE
ACRYLIC, WEATHER-
PROOF.

COLORS: BLACK, WHITE, RED

BOAT LETTERS

Special boat letters and numbers are stocked in 3" **black**, in block style (style 1). Made of butyrate for flexibility, these

letters are excellent for boat identification. They are weather-proof. To cement them, use a waterproof cement such as cement No. 7, page 3

PRICE EACH \$.25

HOW TO CEMENT

1. If the background you choose is also acrylic (see page 3 for acrylic sign faces), cementing is a simple process. Just position the letters flat on the sign face. Using solvent cement No. 25 (page 3) and a small artist's paint brush, run the brush around the edge of each letter where the letter meets the sign face. The solvent will flow under the letter **by itself** and fuse the letter to the sign face. It's as easy as that. Caution, do not use much solvent on your brush; an overflow may scar the sign face. Keep the bottle tightly closed when not in use as the liquid evaporates when exposed to air. **THIS METHOD IS THE EASIEST AND MOST EFFECTIVE WAY TO CEMENT ACRYLIC LETTERS TO AN ACRYLIC BACKGROUND.**

2. To cement the letters to other materials, such as wood, glass, metal or other plastics, many good cements are available. Cement No. 7 (page 3) is excellent as are many modern, all-purpose cements available in your hardware store.

These sheets are available in milk-white and black in 1/8" thickness, in the sizes shown above. Black and/or red letters on a white background are very effective, as are white letters on a black background. Upon request, holes will be drilled 1" in and 1" down from corners for hanging or screwing the sign to another surface. Please add 25¢ per hole.

5% Discount on 12 sheets

10% Discount on 50 sheets

To easily glue your letters to these sign faces, see instructions on page 1 FOR OTHER SIGN COLORS SEE PAGE 16

CEMENTS, CLEANERS, POLISH**Cement #25**

A solvent cement for acrylic to acrylic. Quick setting. Easy to use.

4 oz. jar .. \$.80 Pint .. 1.50 Quart .. 2.50 Gallon .. 7.50

Cement #7

All-purpose cement for various plastics to themselves, to each other, and to wood, glass, metal (except copper) and other surfaces. Waterproof, fast-drying. Will solve most plastic cementing problems. 2 oz jar .. \$.80 Pint .. 3.00 Quart .. 4.50 Gallon .. 10.00

Cleaner #1

Anti-Static Cleaner for Plastics. Cleans, leaves a mirror-like glaze which repels dust and lint. Pint .. \$1.50 Quart .. 2.50

Hand Polish #2

An excellent polishing compound that removes scratches and surface blemishes from acrylic. Restores surface finish. For hand use, use a soft cloth and "elbow grease." May also be used with buffing and polishing wheel. 2 1/2 oz. jar .. \$2.00 10 oz. jar .. 3.00

POLYHINGE®

AN UNBREAKABLE HINGE
LAB-TESTED FOR OVER ONE-MILLION FLEXES.

- Unbreakable • Waterproof • Rustproof • Squeak proof
• Never needs oil • Easily cut to any length • Nail or staple through it • Punch holes in it • Rivet it • Use screws or bolts
• Doubles as a combination hinge and weatherstrip

LAB TESTED FOR OVER ONE MILLION FLEXES WITHOUT FAILURE

**For The
Store
Home
Boat
Farm**

Polyhinge is the most up-to-date concept in continuous hinges. Packaged in rolls, it can be used as a continuous length or cut to make short butt hinges. You can cut it with a sharp knife, shears, heavy scissors. A hand-punch or an ice pick will punch a hole. Nails, screws or staples can be driven through Polyhinge. It is too tough to split or crack.

Available in 2 lengths

4 foot coils \$ 1.98 each
25 foot coils 12.75 each

Colors: White, Black, Silver

FORMED PLASTIC LETTERS

3 DIMENSIONAL

FOR ATTRACTIVE INDOOR AND OUTDOOR BUSINESS SIGNS

The formed plastic letters described on these pages are made to order of acrylic plastic. Delivery takes between two and three weeks. The sizes and styles available offer you a choice of modern, attractive letters.

When ordering, please specify:

1. The number of letters.
2. The exact copy including punctuation.
3. The style of letters.
4. The size of letters. (Be sure to study the "average width" column as indicated on the style charts. Be certain you will

have enough room for your letters. Allow for spacing between letters and words.

- *5. The color. When ordering, indicate color and color code. (see list)
- *6. The type of mounting (see below).

***CAUTION:** If you intend to artificially back-light your sign (NOT AT ALL NECESSARY FOR AN ATTRACTIVE SIGN), be sure to choose colors from the right-hand column of the color list and, do not attempt to mount your letters with miracle pads or stud mounts, since they are not appropriate for illuminated signs. Generally, back-lighting should be done by a professional.

MOUNTING

A plain letter has no mounting device at all and is usually cemented to a flat sheet. This system of mounting is not recommended for large letters or for outdoor signs.

A contour-flanged letter (no extra charge) is a simple method of mounting. Carefully drill holes in the flange (use a metal bit and work slowly, resting the plastic on a solid base). Then screw the letter to the background, using a screw smaller than the hole to allow for temperature change. When ordering, just indicate, "contour-flanges."

Miracle pads are perforated metal plates (see picture). They screw into a tapped plastic nut which has been welded to the inside of the letter. Used with any of the strong "miracle" cements obtainable at your hardware store, the pads will adhere very well to most clean backgrounds — including non-

plastics such as glass, metal, brick, etc. Miracle pads are an excellent means of mounting you letters, but are **not** recommended for artificially lit signs.

Stud mounts consist of threaded plastic nuts, welded to the inside of the letter, and threaded pins — for use when you have access to the rear of the background and can drill a hole through it. **Not** for lit letters either.

Bracket mounts give you "L" shaped brackets bolted to the letters which in turn may be bolted or screwed to the background. Recommended for lit signs.

Free standing letters have clear "L" shaped brackets and brace cemented to the lower part of the letter, supporting it in an upright manner.

COLOR CHART

Color Code		COLOR	Color Code		
FOR NON-ILLUMINATED SIGNS	2039	RED	2115	FOR ILLUMINATED SIGNS*	
	2114	BLUE	2051		
	2108	GREEN	2030

FLEXIBLE CLEAR VINYL TUBING

2 GRADES

1. FOOD & BEVERAGE GRADE TUBING — FDA APPROVED

This flexible, crystal clear tubing is made of pure vinyl, is non-toxic, odorless, highly chemically resistant, and is Food and Drug Administration approved for food and beverages. It may be sterilized at 20 PSI for 15 minutes. Recommended for laboratory use.

All **40** sizes are available in quantities less than 50 feet and in full coils of 50 feet and larger.

2. INDUSTRIAL GRADE TUBING — 25% CHEAPER (than Food & Beverage tubing.)

Industrial Grade tubing is very similar to Food & Beverage Grade tubing, but is NOT FDA approved for food and beverages.

It is a general purpose, utility grade, clear, pure vinyl tubing suited for applications where no human internal consumption is involved. Its chemical resistance is high; it has excellent electrical characteristics.

It is available in 50 foot minimums in all sizes marked with an "I"
